

Mug Shot Photography

Dual Lens Mug Camera Stand

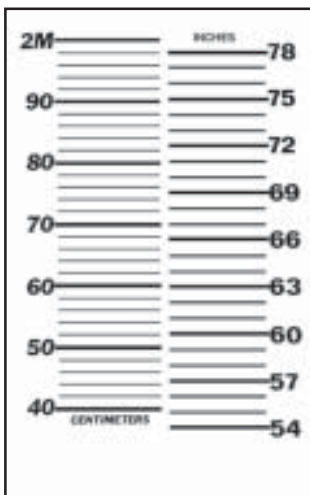

Taking mug shots is easy when you've got our dual lens mug camera stand. Made of seamless steel, the stand's column and three aluminum support feet provide sturdy support for your camera. The stand's anodized aluminum extension arm moves up and down to accommodate the subject's height. Your camera will rest on a 12" x 24" Formica® platform or it can be bolted to the platform. Set up time takes only seconds and the stand is adaptable to any camera system. Also, the stand is easy to transport to any location. Standard lens-to-subject distance is 36". Longer distances are available upon request. The stand is sold separately or with an identification sign, pictured on page 146.

CAT. NO.	DESCRIPTION	PRICE
0621	Camera Stand w/Rotary Sign*	
0622 ..	Camera Stand w/Electronic Digital Sign ** ..	
0623	Camera Stand Only	

*Rotary sign is Catalog No. 0670. Up to five lines are available for agency's name. Specify when ordering. See page 146 for more details.

**Electronic digital sign is Catalog No. 0666. One to three lines available for agency's name. See page 146 for more details.

Height Identification Chart

Bold black lettering and thick horizontal height lines are what you'll see on this height chart. Use it behind your mug shots and they'll be easy to read. Height is listed in centimeters and inches. The chart is 21" x 32" and available separately or mounted on Masonite®. Please specify when ordering.

Mug Shot Identification Signs

Electronic Digital Identification Sign

This is probably the easiest way to mark and date your mug shot photographs. Enter your suspect's identification number—up to six digits—with a few strokes on the keypad that is hidden behind a swing-down door. Your agency's name will be printed on the outside of the door. Date is entered by month, day, year and displayed next to identification number. Black digits are tall and readable in both black and white and color photographs. The sign is 9" x 6" x 1¼" and weighs 24 ounces. It runs on batteries, which are not included. Up to three lines are available for your agency's name. The sign includes a detachable neck chain and camera stand mount.

0665	Electronic Digital ID Sign	

Rotary Identification Sign

The rotary identification sign relies on high-contrast number belts for clear and readable mug shots. Six large digits are featured on the left side of the sign for an identification number, followed by six smaller numbers for month, day and year. Constructed of aluminum and steel, these signs are rugged and will last for years. Unit comes with removable neck chain. We'll print your agency's name on the sign—up to five lines are available—specify when ordering.
