

BLU-V Ultraviolet Inspection Lamp

BLU-V Inspection Lamp

The new BLU-V is a rechargeable UV inspection lamp features cutting edge technology that magnifies and focuses the seven LEDs into one intense UV spot. Extremely lightweight and portable, the BLU-V offers exceptional versatility and utility.

- Perfect for facilities requiring identification of authorized personnel
- Use it with entry/re-entry inks, voting integrity dyes and for close identification of any fluorescent materials
- Excellent for detecting forgeries, false ticket and identification forgeries and exposing fluorescent invisible detection powders and pastes

Features:

- Seven high-powered LEDs produce intense UV Light at 405nm with only limited visible light
- Battery life: 6 hours/5 hour recharge time
- NiMH 1800m/Ah battery has no memory effect and can be recharged at any time
- Monitored light output: UV output remains constant until charge indicator glows red indicating 15 minutes of remaining UV output
- Comes with AC adapter
- Size: 7.375" long, 1.625" barrel diameter, 2" head diameter
- Weight: .48 lb. with battery

Use the BLUV101 when dusting for latent prints.
